I. Policy

Facility Operations and Maintenance department of Energy Services is responsible for generating, distributing and maintaining the high pressure steam (for heating and hot water) and chilled water (for air conditioning) distribution systems. In addition the unit is responsible for the measurement and verification of all energy related measures and new construction. The unit is responsible for managing utility infrastructure and energy related project work.

II. Procedure

If utility services are interrupted, call the Facility Services Work Management Center at 777-4217 between the hours of 8:00 a.m. and 4:30 p.m.; after hour utility problems may also be directed to 777-WORK.

III. Reason for Revision

Policy revisions are needed due to departmental reorganization, departmental name changes, and to comply with changes on state approval procedures.
