All students born after 1956 and initially enrolling at USC Columbia must provide proof of immunity for Rubeola (red measles) and Rubella (German measles). Proof of immunity requires documentation of one of the following:

1. Proper immunization records reflecting that two Rubeola shots and one German measles shots were given after 1967 and after the first birthday.
2. Positive serum titer (blood antibody) for Rubeola or rubella in lieu of required immunizations.
3. Physician diagnosed history of Rubeola, plus meeting one of the above requirements for Rubella. A history of Rubella does not meet requirements.

Registration for Classes

Students without immunization clearance provided by Thomson Student Health Center are not allowed to register for classes at USC Columbia.
