

South Carolina Cancer Center Tissue Bank

Location: The SCCC Tissue Bank is located at the SCCC Basic Science Research Laboratories, 5th Floor, Richland Medical Park 14.

Staff: Director: Phillip Buckhaults, Ph.D. Expeditor: Joanie Capps, MT(ASCP) CHT(ABHI)

Mission: The SCCC Tissue Bank provides tissue samples and associated clinical data to scientists engaged in cancer research. Currently, the Tissue Bank collects breast, colon, lung, prostate, ovarian, and cervical cancers from patients treated at Palmetto Health hospitals. Bulk tumor and normal tissue, serum, normal genomic DNA, and frozen viable lymphocytes are available.

Contact Information: Contact Joanie Capps for information on obtaining tissue.
