

The 11th South Carolina Environmental Symposium

November 6 - 8, 2002

Kingston Plantation - Myrtle Beach, South Carolina

"Water, water everywhere: Water Issues in South Carolina."

The 11th South Carolina Environmental Symposium will focus on a number of the wide-ranging set of water issues facing this state ... and states throughout the Southeast. In presentations, panel discussions, breakout sessions and technology and research displays, participants can select from a variety of timely and relevant topics.

Planning is still underway for the Symposium agenda, but likely topics include:

Panel discussions on the perspectives of water issues in South Carolina --

- Historical and social
- Legal
- Environmental
- Economic

Watersheds, water quality and the stakeholders involved --

- Industry and business community
- Environmental community
- State, regional and local governments
- Citizens and property owners

Water issues affecting South Carolina's economy --

- "Tools" for resolving disputes among commercial water users
- Industry's role in public water policy
- FERC relicensing, the utilities and the public
- The agricultural community and water issues

The Symposium hopes to offer --

- Continuing education credits for geologists and engineers
- CLEs for attorneys (including environmental ethics)
- CEU credits for general participants

The Symposium will again be the occasion for the presentation of the 2002 Governor's Pollution Prevention Awards dinner.
