Establish an Outdoor Learning Laboratory at Piedmont Technical College

Summary of Activities

Dale Smoak

Individuals and groups have been contacted and have begun planning for completing the project. The horticulture and building construction areas have both agreed to be involved and have volunteered their efforts to completing the outdoor lab. The president of Phi Theta Kappa has toured the area and was to present the project to the entire group for approval. A fitness professional has been contacted to aid in the design of the trails and is working on that design. Pricing of video equipment is currently in progress and expected to be completed very soon.
