Disabling a Pop-Up Blocker

The PeopleAdmin USC Jobs website and onboarding site may be blocked from your computer causing you to not be able to login properly the first time. Disable the pop-up blockers by following these steps:

1. You will notice in upper right hand corner of the navigation bar a box with a red X and the notation “Pop-ups were blocked on this page”, if you hover over it as pictured below.
2. Right click on the box with the red X and verbiage will open to indicate which pop-up websites were blocked. Click on “Always allow pop-ups from” and click the Done button. This should allow the website to be recognized on your computer.
