

October is Down Syndrome Awareness Month!

> Learn about Down Syndrome with Dr. Liz Will and Manasi Agrawal

Science Meeting

Dr. Will will present preliminary data from her NIH F32 study on cooccurring autism in Down syndrome and discuss considerations related to early delays and developmental profiles with implications for assessment.

Manasi will present her dissertation work showing morphological changes observed in Down syndrome human iPSC- derived neurons during development and discuss potential pathways that may be contributing to this phenotype.

October 6, 3:30PM

IMB Conference Room 1800 Gervais St.

Join us after for Happy Hour ~4:30PM at the Graduate Hotel
