**SPECIAL TOPIC: LANGUAGE, GENDER, AND SEXUALITY**

This course explores the relationship between language, gender, and sexuality and how language use mediates the social constructions of gender and sexuality, in daily practice and in social institutions. Drawing on interdisciplinary scholarship, the course provides a broad perspective and tools for the study of gender, sexuality, and linguistic practice. Topics covered will include: ideologies of gender and language, cultural definitions and 'borders' of "masculinity" and "femininity" and their relationship to language use, gendered patterns in conversation, politeness, and meaning making, linguistic innovation and self-determination within gender-diverse speech communities, and the interaction between language, gender, sexuality and other aspects of identity. We will cover the different theoretical and methodological approaches that have developed in the last four decades to understand the complex role language plays in producing, sustaining, and perpetuating gender and sexual divisions in society, as well as the potential to challenge and transform them.
