**Children's Law Center**
University of South Carolina School of Law

**Medicolegal Infant Death**
Investigation Training for Coroners

**Who should attend:** South Carolina Coroners

**Overview:** This three-day course is being offered to coroners in South Carolina to focus on the responsibilities of investigating infant death cases. The training will include statistics, causes, and risk factors of unexpected infant deaths; the multi-disciplinary response and protocol; child maltreatment red flags and indicators; burns; abusive head trauma; blunt trauma fatalities; SUID, overlay, and homicidal asphyxiation; infant death scene documentation and processing; forensic toxicology; conducting parent interviews; anatomical dolls and scene reenactment; courtroom testimony; and case studies. These topics will be presented by experts from the Children's Law Center, coroners’ offices, SLED, and SC Children’s Advocacy Medical Response System. PowerPoint, lecture, and group exercises will be utilized for this course.
