* The median cumulative federal loan debt of borrowers graduating in the field of study. Private student loans, Perkins loans, and Parent PLUS loans are not included. Data is based on school-reported information about students' program of completion.

** The median annual earnings of individuals who received federal financial aid during their studies. To be included in the median earnings calculation, the individuals needed to be working and not enrolled in school during the year when earnings are measured. Median earnings are measured in the first full year after the student completed their degree. Salary data is from IRS tax records.

*** The median monthly loan payment is debt repaid in 10 years at a 4.53% interest rate. A 10-year fixed payment plan is one of several available to Federal borrowers.

**** With only 344 graduates, this may be only one cohort at Kenan-Flagler Business School, which has about twice this number in its two-year (junior/senior) business program that comprises around 13% of the Moore School student body. The Moore School's top two majors (International Business, and Operations and Supply Chain/Management Science) graduated 360 students in AYs 16/17, though some double majored in these two majors. According to data gathered annually and reported in the Moore School's [2019 Undergraduate Majors Report](#), of the self-reported salaries for AYs17/18 the average salary for the top 15% was \$74,693. These students also had far more academic choices than UNC Chapel Hill students did, given the Moore School's scale, academic depth and academic diversity.
