  • International Business Research-based Issue Essay (1000 word maximum)
INTERNATIONAL BUSINESS STATEMENT OF PURPOSE ESSAY

(500 word maximum)

Why do you want to be an International Business major? Why did you pick the language in which you are using to satisfy the International Business major requirement? How do you anticipate a degree from the Moore School’s International Business department, your chosen 2nd business major, and your chosen language will combine towards a career path?
CROSS-CULTURAL EXPERIENCE ESSAY

(500 word maximum)
The most effective global managers can understand and navigate the complexities of international business while also building meaningful and responsible relationships with people of various nationalities, value-systems, administrative styles, and world experiences. Describe a time in your life when the culture in which you were raised complemented or clashed with a culture outside of your familiarity. As an example, this event could have occurred during a previous experience abroad or even within your own school or community. How did you navigate the situation and what did you learn from it?
INTERNATIONAL BUSINESS ISSUE ESSAY: INSTRUCTIONS

(1000 word maximum)

The International Business major requires that you understand the impact of globalization on the conduct of business and the interactions between businesses and governments that shape the global arena. We have identified three issues which have emerged over the past few years that will most likely have relevance to your future business career.

Based on research on the issue that you will conduct prior to the deadline for this application, you will pick one issue and write a 1,000 word essay on the anticipated impact of these phenomena on the conduct of global business. Because the issues are relatively broad and the limitations of space are substantive, your ability to be concise in providing the analysis will be of great value.
INTERNATIONAL BUSINESS ISSUE ESSAY: INSTRUCTIONS

It is important that you demonstrate your own thoughts and analysis. If you include information in your essay that is not your own thoughts, you must cite appropriately. We recommend APA or MLA format. Any works cited should be included at the end of the document and will not be counted against your maximum word count. A separate works cited page is not necessary. Essays will be checked using antiplagiarism software.
In 2020 the world began to witness the global effects of a pandemic rapidly spreading across all countries. The scope and uneven impact of the pandemic introduced new global risks to all societies with respect to the varying local approaches that nations have taken in their responses to the acute effects of the virus. These varying approaches include different orientations in national health policies as well the different responses to the constraints on international trade experienced in global supply chain disruptions.

Write an essay about how nations have addressed the pandemic at both the global and local levels. Directly address the types of challenges and dilemmas that are global in scope as well as the challenges experienced in the variations of countries’ local responses. Also, address the kinds of opportunities that you see ahead for national governments and the private sector (i.e., industry and multinational corporations to collaborate in ways that can mitigate related risks in international business and trade. You should use specific examples to strengthen the points in the essay.
Global trade and the complexity of global value chains (GVCs) have intensified over the last five decades. The pandemic and the current conflict in Ukraine and Europe have emerged at a time when powerful economies and nation-states are challenging the world order of global institutions that emerged in the post-World War Two era. Write an essay on the kinds of challenges that global institutions are facing in the 21st century with respect to international business and trade. You should provide examples of how recent challenges and forces of disruption in global markets are shaping new forces in the geopolitical and economic landscape.
The ongoing Russo-Ukrainian War and subsequent bans on the export of Russian energy (oil and natural gas) and resistance from major energy exporting countries such as Saudi Arabia to increase output have fueled ongoing inflation in Western Europe and the United States. Beyond short-term concerns over home heating and gasoline prices, what are likely to be the long-term impacts on international business of sustained high energy prices? Consider how sustained high energy prices may impact international trade, finance, tourism and/or technology development.
