COLLOQUIUM SERIES

The Role of Energy Balance and Energy Flux in Weight Management

Clemens Drenowatz, PhD

Assistant Professor, Exercise Science

Arnold School of Public Health

University of South Carolina

[Faculty Profile](#)

Dr. Drenowatz received his Ph.D. in Kinesiology, specializing in Exercise Physiology from Michigan State University. After completing his post-doctoral work in Germany and the UK he he joined the Department of Exercise Science in the Arnold School of Public Health at the University of South Carolina in 2013. Dr. Drenowatz' research focuses on the regulation of energy balance and its implications for weight management and health. Specifically, he is examining the role of compensatory behaviors (i.e. changes in dietary behavior and habitual physical activity) in response to alterations in physical activity or exercise. Dr. Drenowatz has published more than 30 peer-reviewed articles, 2 book chapters and 2 books. He presented his research at various national and international conferences and is a member of American College of Sports Medicine and the European College of Sport Science.
