Childhood Obesity PhD Student/s

Fully Funded Graduate Research Position Announcement

August or December start date

The Arnold School of Public Health at the University of South Carolina is currently seeking PhD level applicants who are interested in pursuing a research-focused doctoral degree on the topic of childhood obesity. Candidates with a focus on children, overweight or obesity, obesogenic behaviors that include diet, sleep, physical activity, screen time, or sedentary behavior, and their measurement are invited to apply. PhD students will be integrally involved in the studies conducted by the Arnold Childhood Obesity Initiative research group and the Research Center for Child Wellbeing. These include measurement, observational, and intervention studies that are funded by the National Institutes of Health and are designed to understand the etiology, prevention, and treatment of childhood obesity and its associated behaviors. Candidates will have the opportunity to be part of a vibrant team of faculty, staff, and students located within the Arnold School of Public Health. These positions are fully funded and include tuition and a stipend that is commensurate with the NIH rate.

Individuals will develop the following skills as part of their doctoral degree program:

- Proficiency in basic and complex statistical modeling
- Measurement studies
- Process evaluation/implementation science
- Written and verbal communication skills
- Designing and implementing community-based interventions
- State-of-the-art behavioral assessments
- Grant writing
- Ability to work effectively both independently and with a team

To apply, please send a statement of interest and CV to:
